Agenda

- Static configuration:
 - That is hardwired configuration, not programmable anytime.
 - Static entries, static MDs, and/or static association (RRID → MD/entry)?
 - ✓ It can be understood as pre-locked configurations.
 - ✓ Channing's proposal: <https://lists.riscv.org/g/tech-iopmp/message/61>.
- The fixup of draft 6:
 - ✓ Link: <https://github.com/riscv-non-isa/iopmp-spec/releases/tag/v0.9.0>.
- Next draft to be the stable spec:
 - ✓ If you have any other topics before the stable version, please raise your hand soon!
