

# IOPMP Task Group Meeting

## April 13, 2023

[Video link](#)

# Topics

- Any update related to IOPMP: from the Runtime Integrity SIG?
  - CFI proposal in peer-review: the shadow stack and the landing pad.
- Any feedback: Lock MDCFG, static IOPMP entries, and error reactions?
  - NVIDIA will propose a multiple-hart solution once they reach internal consensus. Single hart (error receiver) may not be enough.
- Sifive's WorldGuard was donated, any feedback?
  - ISA Part: not related to IOPMP
  - non-ISA part: a kind of transaction filer, doing a similar job as the IOPMP
