

IOPMP Task Group Meeting

February 15, 2024

[Video link](#)

Meeting Notes

- The RERI-compliance error report
 - Andes' proposal: presented
 - Question1: can we repurpose the CE (corrected error) as the interrupt control?
 - Question2: per-entry bus error selection
- Resolve the overlap of the World Guard checker and IOPMP:
 - Per-entry interrupt control: by the RERI feature if we can repurpose CE.
 - The programming model of the association between RRIDs and entries: reference?
 - ✓ Sifive's reference usage and/or its corresponding code: presented
 - An entry is locked by an individual bit or by an incremental counter?
 - ✓ Sifive's evaluation: run-out-of-time
- Draft 6:
 - The update list will be closed by the end of February.
