# IOPMP Task Group Meeting
December 19, 2024

Attendees

Minutes

- Functional models:
  - Architecture mode: a C model is provided by 10x Engineers, who wants to donate and promise to maintain one. ➔ Fatima and Gull presented their C model; slides: https://lists.riscv.org/g/tech-iopmp/message/344
  - Where should we put these models? ➔ Channing will help us figure it out.
- The feedback of r0.9.2-RC2:
  - An IOPMP is allowed to use the "retry" bus protocol to implement the RRID stall as an alternative to "~~waiting queue~~" or "back pressure" : ➔ No objection and accept.
  - The current spec could cause hanging on the legacy bus on stalling RRIDs.
    - Channing brings us Nivida's proposal. ➔ No objection and accept.
  - r0.9.3-RC3 will be release within a week.
